## Directions

Corpus preparation:
Place the biscuits and almonds in the food processor and chop finely. Add the butter and mix to combine. Grease a cake tin with a diameter of 22 cm and line the bottom with baking paper. Press a uniformly thick layer of cookie-almond mixture into the mold and let it cool.

In a food processor, prepare smooth cottage cheese and spread butter with sugar, egg, lemon peel and pulp from a vanilla pod. Beat and apply the mixture to the prepared body. We bake on the specified program so that the filling is golden around the edges and slightly wobbly in the middle.
After the end of the program, let the cake cool down slowly in an open convection oven.
