Directions

✓ The first stage

◇ Air-dried before and after, the oven production process uses the probe mode

◇ At this stage, dry the surface moisture of pork belly

✓ The second stage

◇ At this stage, in order to explode the pork skin, the water is baked to make it drier

◇ Using a spatula or fork, poke holes evenly on the skin

◇ Only high temperature can dissolve grease, and the temperature is increased by 30°C

✓ The third stage

◇ At this stage, the high temperature is roasted, and the pork skin begins to burst

◇ The pigskin is not flat, it will be dealt with in the next stage

✓ The fourth stage

◇ In the final stage of popping the pigskin, open the door twice in a row to take out the pigskin and scrape it evenly
