Directions

- ◇ Frozen cooked pizza is a baked noodle product, which can be directly frozen for cooking due to the low density of ingredients
- ◇ Frozen cooked pizza does not need to be thawed before making, to avoid soft rot affecting the taste
- ◇ Preheat the pizza pan for 10 minutes before reheating to avoid freezing moisture affecting the crust
- ◇ High temperature and high pressure cooking, steaming and roasting water molecules are fine and penetrating, and the fast heating effect is good

Recommended accessories

Vision Bake

Perforated aluminium sheet, teflon coated
